

**MANAGEMENT'S DISCUSSION AND ANALYSIS  
QUARTERLY HIGHLIGHTS**

**For the six months ended June 30, 2025**

(Expressed in Canadian dollars)

**SUN PEAK METALS CORP.**  
**For the six months ended June 30, 2025**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**

---

The following is management's discussion and analysis – quarterly highlights ("MD&A") of the results of operations and financial condition of Sun Peak Metals Corp. (the "Company" or "Sun Peak") for the six months ended June 30, 2025 and up to the date of this MD&A, and has been prepared to provide material updates to the business operations, financial condition, liquidity and capital resources of the Company since its last management's discussion and analysis for the fiscal year ended December 31, 2024 (the "Annual MD&A").

This MD&A should be read in conjunction with the Annual MD&A and the audited consolidated financial statements for the year ended December 31, 2024, together with the notes thereto, and the accompanying unaudited condensed interim consolidated financial statements and related notes thereto for the six months ended June 30, 2025 (the "Financial Report").

All financial information in this MD&A is derived from the Company's financial statements prepared in accordance with IFRS Accounting Standards and all dollar amounts are expressed in Canadian dollars unless otherwise indicated.

The effective date of this MD&A is August 28, 2025.

### **Description of the Business**

Sun Peak is a publicly traded company incorporated pursuant to the provisions of the British Columbia Business Corporations Act on June 2, 2016. The Company's common shares are listed for trading on the TSX Venture Exchange under the symbol PEAK and on the OTCQB Venture Market in the United States under the symbol SUNPF. The Company's head office and registered and records office address is Unit 1 – 15782 Marine Drive, White Rock, B.C. Canada V4B 1E6.

The Company's principal business is the acquisition, exploration, and development of resource properties for the mining of precious or base metals in Ethiopia.

Sun Peak has been actively investigating other potential opportunities. The Company will provide further details when available.

### **Force Majeure**

In March 2025, the Interim Regional Administration of Ethiopia enacted a suspension of all mining activities in Ethiopia to curb illegal mining activities. While the Company's operations are currently limited to exploration and not mining, the Company suspended all fieldwork accordingly. In August 2025, the Company formally notified Ethiopia's Ministry of Mines of a force majeure declaration covering all six of its exploration licenses within the Shire Project. The Company also invoked force majeure under the terms of its option and joint venture agreement with Ezana Mining Development plc ("Ezana"), with notification accepted by Ezana.

**The Shire Project**

Sun Peak is exploring the district-scale Shire VMS Project in the Tigray Region of northern Ethiopia. The Shire Project is comprised of six exploration licenses and covers approximately 1,450 square kilometers in the prospective Arabian Nubian Shield. The licenses are in the same geological environment as both the Bisha Mine and the Asmara Projects to the north in Eritrea. The Sun Peak team have worked in East Africa for more than two decades and the Company's strategy is to apply exploration techniques that have worked successfully in the region before, to build assets through major copper-gold VMS discoveries.

As announced February 27, 2025, Ground Time-Domain Electro-Magnetic ("TDEM") surveys were conducted on both the Meli Trend and Anguda North Target. This work will be used to prioritize the next drill locations. The complete TDEM results are pending.

Field exploration crews have been active at the Shire Project, conducting detailed geological mapping, rock sampling, and grid-based soil sampling on numerous VMS trends, priority and pipeline target areas. The newly identified gossans show significant gold and silver in grab samples at surface. The primary massive sulphide zone below the gossan targets will also be investigated for copper and zinc potential, as seen in other VMS deposits in the region.

On June 27, 2025, the Company announced that exploration activities, including the Time Domain Electromagnetic ("TDEM") survey, had been temporarily paused in line with the beginning of the rainy season and seasonal planning. The TDEM program, initiated in January 2025, progressed steadily despite political challenges in the region, demonstrating the team's adaptability and commitment to advancing exploration in a dynamic environment. The survey results will be used to refine drill targets for the next phase of exploration. In total, the TDEM survey completed 938 stations on 43 lines over 5 target areas. The data from the survey is being compiled with other geological, geophysical, and geochemical data to identify and prioritize drill targets. However, evolving regional conditions in Tigray influenced the pace of survey completion, and the Company remains attentive to opportunities for resuming full coverage as the situation stabilizes. The results from the compilation work and future planned TDEM surveys will determine the future drill targeting on the Shire Project.

In parallel with its strong commitment to the Shire Project, the Company is proactively assessing additional high-potential opportunities to further enhance shareholder value. The goal is to remain committed to the success of the Shire Project and advance it further as regional conditions stabilize, while also securing a high-quality project elsewhere in the world to continue building value and maximize returns for shareholders.

**Qualified Person**

The technical content of this MD&A has been reviewed and approved by David K. Daoud, B.Sc. P.Geo., a qualified person as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects.

**Trends**

The Company is an exploration company, and as such issues of seasonality or market fluctuations can have an impact on the expenditure patterns. The conflict in Ethiopia had, and the state of the political stability continues to have, a major impact on the Company's operations, as noted above. The Company expenses its exploration, project investigation and general and administration costs, and these amounts are included in the net income (loss) for each quarter and year. The Company's treasury, in part, determines the levels of exploration.

---

**Community Engagement and Human Rights**

Sun Peak has been active on engagement with communities and other stakeholders to ensure that stakeholders provide consent and agreement to our activities that create surface disturbance, including drill holes. All disturbance to the land will be reclaimed after completion of the exploration work. The Company's current operations in Ethiopia are exploratory in nature and cause very little surface disturbance. Community engagement is performed by our experienced local liaison team before the beginning of any activities, which encourages positive interactions. We consider Sun Peak's presence and continued support and involvement in the Tigray region a positive contribution and we consider our conduct to be consistent with Multinational Enterprises Guidelines. Sun Peak is committed to doing business with integrity and in an ethical manner that is clear and apparent to all internal and external stakeholders. Sun Peak adheres to the Company's Human Rights Policy and does not tolerate violations of human rights in any way, shape, or form, whether these violations are committed by Sun Peak personnel or contracted third parties. Sun Peak has in place a thorough due diligence process which takes into account a wide range of considerations, including human rights, that provides it with all relevant information necessary to make informed decisions when initiating work programs.

**Financial Condition and Results of Operations – six months ended June 30, 2025**

The consolidated net loss for the six months ended June 30, 2025 was \$876,822 compared to \$1,423,609 for the six months ended June 30, 2024.

The significant changes between the current period and the comparative period are discussed below.

Exploration and evaluation expenditures for the six months ended June 30, 2025 totalled \$141,230 (2024 – \$241,593) and relate primarily to general and administration costs of the Company's Ethiopian subsidiary that have been allocated to the Nefasit exploration license. As noted above, the Company has declared force majeure and ceased exploration work on its exploration licenses.

Project investigation costs for the six months ended June 30, 2025 totalled \$17,913 compared to \$Nil in the comparative period and relates to the identification of new exploration properties investigated by management of the Company.

Salaries and benefits for the six months ended June 30, 2025 totalled \$364,665 (2024 - \$328,770) and primarily relates to salaries paid to the Chief Executive Officer, the VP Exploration & Geology, and the VP Project Development. The Chief Executive Officer and the VP Exploration & Geology have been seconded to other companies to varying degrees so that the portion of the salary paid by those other companies reduces each executive's salary from Sun Peak.

Non-cash share-based compensation for the six months ended June 30, 2025 totalled \$Nil (2024 - \$554,820) and relates to stock options that were granted and vested during the period.

**For the six months ended June 30, 2025**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**

---

**Liquidity and Capital Resources**

The Company began the fiscal period with \$2,265,655 cash. During the six months ended June 30, 2025, the Company spent \$932,156 on operating activities, net of working capital changes, and \$640,124 on investing activities, to end at June 30, 2025 with \$693,375 cash.

During the six months ended June 30, 2025, the Company spent \$634,959 on the Terer and Meli exploration licenses, towards its earn-in requirements to the JV Agreement as described in Note 9 to the Financial Report. This amount was recorded as deferred acquisition costs on the statement of financial position.

As at June 30, 2025, the Company had working capital of \$722,705. Management estimates that its working capital may not provide the Company with sufficient financial resources to carry out currently planned operations and exploration through the next twelve months. Additional financing may be required by the Company to complete its strategic objectives and continue as a going concern. While the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

**Related Party Transactions**

The Company had no other related party transactions other than those incurred in the normal course of business as disclosed in the Financial Report.

**Additional Disclosure for Venture Issuers without Significant Revenue**

The components of exploration and evaluation assets are described in Note 8 to the Financial Report.

**Disclaimer for Forward-Looking Information**

Certain information and statements in this MD&A may be considered forward-looking information or forward-looking statements for purposes of applicable securities laws (collectively, "forward-looking statements"), which reflect the expectations of management regarding its disclosure and amendments thereto. Forward-looking statements consist of information or statements that are not purely historical, including any information or statements regarding beliefs, plans, expectations or intentions regarding the future. Such information or statements may include, but are not limited to, statements with respect to completing the obligations to earn a 67.5% interest in the JV Agreement, the goal of making a significant discovery and the development of a large-scale project in Ethiopia and identifying other potential properties and opportunities both in Ethiopia and globally. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits Sun Peak will obtain from them. These forward-looking statements reflect management's current views and are based on certain expectations, estimates and assumptions, which may prove to be incorrect. These assumptions and risks include, but are not limited to, assumptions and risks associated with the state of the political stability of Ethiopia, equity financing markets and results of future exploration activities by the Company. These forward-looking statements are made as of the date of this MD&A and, except as required by applicable securities laws, Sun Peak assumes no obligation to update these forward-looking statements, or to update the reasons why actual results differed from those projected in the forward-looking statements. Additional information about these and other assumptions, risks and uncertainties are set out in the "Risks and Uncertainties" section in the Prospectus filed with Canadian security regulators.
